

A Solid Foundation for Your Generac® Generator

The GenPad™ from DiversiTech® is a professional pad/base that will provide a lifetime base for your Generac® Residential Standby Generator. Each pad is made from a composite of high strength fibers and cement and is warranted for the life of your Generac® Generator. These pads provide a sturdy, permanent base for the generator that won't shift, crack or degrade over time. More peace of mind with your Generac® Generator purchase from Hale's Electrical Service, Inc.!

GenPads™ have been specifically designed to meet the engineering specifications of all Generac® Residential Air-Cooled Home Standby Generators. All GenPads™ include the following features:

- ◆ Extremely Impact and Breakage Resistant
- ◆ Fiber reinforced concrete that is further reinforced with rebar
- ◆ Flat bottom to facilitate easy leveling of the pad and generator
- ◆ Virtually eliminates sinking of the unit into the ground
- ◆ Easy to install
- ◆ 1/2 the weight of poured concrete
- ◆ Meets national gas code NFPA 37

FREQUENTLY ASKED QUESTIONS:

Is the GenPad™ approved by Generac® for use with its generators?

YES, the GenPad™ has been tested and approved by Generac® as an alternate installation method to poured concrete pads and direct placement. The GenPad™ is designed to fit the mounting bolt pattern of all Guardian Series 8-20kW home standby generators.

Why do I need a concrete base, as the unit comes with a base?

The polymer base that comes with the unit is not built to keep the unit level. The GenPad™ provides a solid, sturdy foundation for the Generac® Guardian Series generators and eliminates the risk of uneven mounting surfaces. Many local area codes may also require a concrete base for the generator. The GenPad™ provides extra height off the ground for the generator for ponding of water, run off, etc. Having a sturdy foundation such as a GenPad™ or concrete slab help in securing the unit and keep it level over the life of the generator to maximize its performance and life. The GenPad™ is faster and easier to install than pouring a concrete pad and therefore saves our customers installation dollars as well!

Does the GenPad™ have a warranty?

YES, the GenPad™ is warranted from defects in materials and/or workmanship for the life of the Generac® Generator that it supports. All warranty claims are handled directly with DiversiTech.

Does the GenPad™ qualify as a "Green" product?

YES, the GenPad™ contains 25% recycled materials.

Is the GenPad™ reinforced with rebar?

YES, the GenPad™ is structurally reinforced with rebar in the lower 1/3 of the pad.

Can I buy a GenPad™ directly from Hale's Electrical Service, Inc. for my own installation?

YES, Hale's Electrical Service, Inc. stocks the GenPad™ for our customers, contractors, builders and Generac® Dealers. For current prices and quantity discounts, contact our office: (804) 265-5976
